AI Platform Leadership & Agentic Systems

Miami, FL | osmarmorales1@gmail.com

osmarmorales.io | linkedin.com/in/osmarmorales | github.com/osmarmorales1

I build AI-native teams.

I create systems and processes that automate work and scale business capability. I combine hands-on AI engineering with workforce leadership, turning agents, reusable skills, shared knowledge and distributed compute into faster delivery and stronger teams.

3x

Delivery pace

With the same resources

500+

AI platform users

Organic adoption

5 regions

Global adoption

Across Visa teams

PROFESSIONAL EXPERIENCE

Visa | Director, AI Agent Platform

October 2024 - Present

Led 15+ people; hundreds of agents deployed and running concurrently.

- **Tripled delivery pace with the same resources** through an AI enablement platform (Agent Factory), supporting 500+ users across five regions.
- Standardized recurring work through a continuous learning loop that improves reusable skills with collective knowledge and recommends them at runtime.
- Simplified adoption for business users with a unified AI interface (V Agent), connecting agents, platforms, tools and Agentic Slack collaboration.
- Reduced repeated discovery with shared business memory (VCA Brain), helping teams reuse project context, observations and prior work.
- Made local, remote and cloud compute accessible through on-premises orchestration, including Windows VDIs, so teams can delegate without managing execution complexity.
- Expanded delivery capacity with agents working for hours or days, supported by AI governance and cybersecurity: monitoring, isolation, scoped access and human review.

Visa | Director, Data Engineering

November 2020 - September 2024

Led seven data engineers and a six-person AI workstream across 20 concurrent cross-market projects.

- Accelerated model preparation and client analytics: feature-store creation fell from **one week to 12 hours**; agent-driven benchmarking from **1-3 days to 1-3 hours**.
- Preserved delivery while migrating 1k+ repositories and 500+ pipelines to standardized MLOps and GitHub/Jenkins CI/CD.

Visa | Manager, Data Analytics

November 2018 - November 2020

- Accelerated analytics with cubes ready in **five hours vs. three weeks**; enabled 40+ colleagues to run pipelines through Azure DevOps self-service automation.

Osmar Morales

CAREER EVIDENCE / TECHNICAL DEPTH

FOUNDER EXPERIENCE

Elygent | Founder & AI Platform Architect

October 2025 - Present

- Founded Elygent, an AI platform company, to make complex work easier to delegate through connected open-source agents.
- Enabled tool and knowledge reuse across AI environments through LLM- and harness-agnostic API, CLI and MCP integrations.
- Built an Agentic Slack collaboration system and AI orchestration platform, connecting human-agent conversations to delegated work and isolated computer use.
- Exploring shared compute, digital twins and AI ontology for reusable business context.

EARLIER CAREER

FedEx Express | Data Scientist

August 2016 - November 2018

- Built executive reporting and BI platforms that gave leaders financial visibility across a \$1.5B business.

TracFone Wireless | Revenue Systems Analyst

February 2013 - August 2016

- Cut revenue analysis time by two-thirds with analytical models and rebuilt ETL for a 25M-subscriber business.

FedEx Express | Process Automation Developer

March 2012 - February 2013

- Cut reconciliation time 70% with custom software and standardized reporting across Latin America and the Caribbean.

Davis Quality, Inc. | Systems Accountant

January 2007 - January 2012

- Built accounting and data systems that improved financial visibility and planning.

AI ENGINEERING AND TECHNICAL CAPABILITIES

Agentic AI: Claude Code/Codex harnesses, LangChain ecosystem, APIs/CLIs/MCP/A2A, terminal workflows and computer use.

LLMOps: LLM-agnostic routing, frontier/open-weight models, RAG, shared memory, evaluations and observability.

Distributed computing: Linux VPS, Docker, Kubernetes; local, remote and cloud agent execution.

Data and MLOps: Python, SQL, Spark, Apache Airflow; feature engineering platforms, feature stores and data quality.

CI/CD & cybersecurity: GitHub, Jenkins, Azure DevOps; security monitoring, scoped access and audit trails.

EDUCATION, RECOGNITION AND LANGUAGES

Florida International University | BBA, Finance; Mathematics minor | 2015. **Miami Dade College** | AA, Mathematics | 2008.

Harvard Extension School | Management and leadership communication, professional development | 2018-2020.

Visa LAC Support Excellence Award, 2026; FedEx Express LAC Professional of the Year, 2017; five Visa Technical Innovation **team awards**, 2023-2025.

Languages: English and Spanish; Portuguese (beginner).
